Description

I upgraded from 1.85 to 1.9.0 without any problems. Things were working fine. Today, however, I logged in to access the admin area, and no admin links from the menu! All gone! What do I need to do to fix this? How can I access the admin area without links?

Solution

Fiexed this by 1) accessing tiki-admin_system.php directly from browser, and then emptying
./templates_c/ Empty (70 files / 672.93 Kb)
./modules/cache/ Empty (18 files / 32.28 Kb)
./temp/cache/ Empty (32 files / 43.72 Kb)

This fixed the problem immediately. I recall this mentioned in the instructions, but, for a novice, they may not know where to find this.
