

Which tiki objects?: I would say, in this order:

1. specific forums
2. specific blogs
3. specific calendars
4. specific newsletters (ML: we can already subscribe groups to newsletters)
5. specific wiki pages
6. specific structures
7. specific trackers
8. specific categories
9. new articles

This is specially useful for new users of the site, where they don't know yet how to subscribe to specific areas, etc. Very needed for educational scenarios, but I can see many other places where new users are a bit lost for some time while they learn how to use the Tiki site.

Related:

- Forum: Let forum admins/moderators add groups and/or users as watching the forum
- Let small business start ups access collaborative sharing where the document being shared is not visible by anyone else

Anywhere there is a watch eye, it should be possible for an admin to have group members watch this category

watching categories would let us do simili-workspaces

Marc Laporte 13 Feb 10 13:15 GMT-0000

With this, you should have it all, no?

Xavier de Pedro 22 Nov 13 09:43 GMT-0000

Yes, group watch on categories would probably do (good idea)
