Description

Tiki wiki doesn't include yet a tool allowing users to generate a dynamic mind map. This would give users a great overview of the structure of the wiki (i.e. project, organization structure) but also help them deal with complexity, making unexpected links.

Solution

Wikimindmap.org is a great example of this feature.

May be it is possible to develop something similar for Tiki based on it :

<http://www.wikimindmap.org/getWikiMindMap.htm>

The work is started in Tiki 3.0:

Mind Map
