Description
In 1.9.x, Side-by-side diff is the default

Sometime in the history of 1.10 (around when WYSIWYG editor arrived I think), HTML diff became the default.

This appears to be more of an accident than a conscience choice.

Side-by-side should re-become the default.

Ever better, the admin should should what the site default it.

Even better, each user could override this value in their preferences.

Solution
Was fixed in Tiki3 or Tiki4
