Description
- While creating a new tracker in 1.10 error occurring.
- An error occurred in a database query!

Context:
- File tiki-admin_trackers.php
- URL tiki-admin_trackers.php
- Query:
  - insert into `tiki_trackers`(`name`,`description`,`descriptionIsParsed`,`created`,`lastModif`)
  - values(?, ?, ?, ?, ?)
- Values:
  - 0 daaku
  - 1
  - 2 NULL
  - 3 1213325032
  - 4 1213325032
- Message:
  - Unknown column 'descriptionIsParsed' in 'field list'
  - Built query was probably:
    - insert into `tiki_trackers`(`name`,`description`,`descriptionIsParsed`,`created`,`lastModif`)
    - values('daaku', '', NULL, '1213325032', '1213325032')
- In database couldn't find 'descriptionIsParsed' field. Is it missed?
Solution
When re-installed with latest SVN the problem went away. I did see the column 'descriptionIsParsed' added to 'tiki_trackers' table.

Created a new column 'descriptionIsParsed' on tiki_tracker, now it is working. Isn't it installation script should create the table with right columns ?
