Description

When the Wiki feature is disabled, some links are created pointing to nowhere.

Example:

http://www.vic-fontaine.com/forum/tiki-view_forum_thread.php?comments_parentId=13&topics_sort_mode=lastPost_desc&forumId=1

First link points to:

<http://www.vic-fontaine.com/forum/tiki-index.php?page=Fw: LOVE WORDING WALLPAPERS>

"This feature is disabled: feature_wiki"

Similar in articles:

http://www.vic-fontaine.com/forum/tiki-read_article.php?articleId=1

A link to is automatically created for the key word TikiWiki:

<http://www.vic-fontaine.com/forum/tiki-editpage.php?page=TikiWiki>

Test user/password: smarty

Solution

Fixed in future version 3.0 with commit 15304.

This issue occurs when Wikiwords is enabled and wiki feature disabled.

In this case, the parser is creating links to wiki pages written in CamelCase. The parser, before creating a link should test if wikiwords enabled AND wiki enabled.
