Description

The "Tiki User Registration Request" email that is sent to admins when a new user registers may not contain enough info for the admin to make a decision as to whether or not to approve the registration. The only link in that email automatically validates the user without any second chance (if the admin thought that after following that link he would be given a chance to review the new user info before validating the unknown user, he will be mistaken).

templates/mail/moderate_validation_mail.tpl should be improved to include any user tracker info that the new user has submitted, or provide a link to view any such user info.

Solution

As a temporary work around, I hard-coded this into my moderate_validation_mail.tpl:

`{tr}To view the user data, please follow the link:{/tr}`
`http://mysite.com/path/tiki-view_tracker.php?trackerId=1`
