Description
Module featured links is not working for me.
I enabled the feature in a 1.10 svn site (code from may 2008). I created this new link:
http://xarxantoni.net/Xarxes.html

Title: Xarxes
Position: 1
Link type: framed

and no way... featured_links module shows no link.

Hi Xavi,
does this bug still apply to Tiki trunk, or otherwise Tiki 3.1? If so, do you see any PHP error?
