Description

When you use the tracker field "items list" to link (for instance) offers and demands (or goods from an inventory, etc.), the option to specify to list only the open items, for instance, is needed. If a product is out of stock, would be set as out of stock, and maybe marked as "pending", or if discontinued, marked as "closed". And it shouldn't be listed through the "items list" field.

Nowadays (2.0rc2), it's not clear to me how this could be achieved (if so).
