Description

Hi to all,

I want to know if you can create a protected page that only logged in users can see, I know I can turn off the wiki so only logged in users can access it, but is there any way that I can put under restriction only a few pages since they contain some important info that can be shared only by users that have accounts on the wiki.

Many thanks

Solution

See comments.

If you don't know how to do, please first ask your question either on IRC #tikiwiki, on forums (on tikiwiki.org community site) or on the users mailing list (you can subscribe on sf.net tikiwiki project page).

Yes, you can. See the docs. This is really a forum question on tw.o and not a dev issue.

I believe it should be possible to put in those pages in a category and then set a category setting for only registered users.
