### Description

In TikiWiki 1.9.11 When a Wiki page is included within another page, the "tiki\_p\_view\_categories" permission does not seem to apply. My investigation was as follows:

1. I assigned "tiki\_p\_view\_categories" to a Category A, and specified Group A.
2. I logged as User B, from Group B
3. I copied and pasted the URL of the restricted page, and received a "Permission denied you cannot view this page" message (GOOD)
4. I searched for the page and it did not appear in the Search Results (GOOD)
5. When I accessed a page that included the page via the plugin, the content did appear. (BAD)

The Group+Category permissions should work exactly as they do for Group+Page permissions – namely, a page never appears to a user outside the group, whether accessed directly, or via inclusion through the plugin.

### Solution

nikhilodeon 08/14/2008: Resolved with upgrade to 2.0

Won't fix in 1.9. Could you test in 2.0, please ?
