### Description

When upgrading to 2.0 rc4 from 1.9.11 install failed because I was not logged into the app. By the time I reached that stage, I was no longer able to login. Need to make note at the beginning of the upgrade procedure instructions to **FIRST LOG INTO TIKIWIKI AS ADMIN**

### Solution

When I deleted the files in top-level directory and replaced them with the original ones, and replaced the lib and db folders as well with the version from 1.9.11 I was able to log in as admin although I still got an error - but I knew I was logged in so it didn't matter. Then I replaced the top-level folder with the 2.0 files and replace the lib and db folders with the 2.0 versions. Then success in running the upgrade.
