### Description

for example:  
5 users in group home  
6 pages in category home

I want all public can view these 6 pages in home category, but only these 5 users can edit pages content ( not the objects in the category, it is the content of the page!! ).

I know I can setup the permissions page by page to the home group, but what I am looking for is category to group relationship, not page to group, don't want to do it page by page, or maybe there is one way to do that, but I don't know yet.

Thank you very much.

Have a good day.

Best,  
Peter

### Solution

This is already possible in 2.0.

If you don't know how to do, please first ask your question either on IRC #tikiwiki, on forums (on tikiwiki.org community site) or on the users mailing list (you can subscribe on sf.net tikiwiki project page).

You can set category permissions just like this at [/tiki-admin\\_categories.php](/tiki-admin_categories.php)

click the green key for the category you want to change
