Description

Tring to create a structure results in the error:

An error occured in a database query!

Context:

File tiki-admin_structures.php

Url tiki-admin_structures.php

Query:

```
insert into `tiki_structures`(`parent_id`,`page_id`,`page_alias`,`pos`) values(?,?,?,?)
```

Values:

0 0

1 2

2 Test Structure

3 1

Message:

Field 'structure_id' doesn't have a default value

Built query was probably:

```
insert into `tiki_structures`(`parent_id`,`page_id`,`page_alias`,`pos`) values('0','2','Test Structure','1')
```

If the process is repeated the error thrown is different: 1 page not added (Exists)

Found with clean installs of 2.0RC4 on Windows Server 2003 x32 and also server 2008 x64. PHP 5.2.6 (x32); MySQL 5.0.51b (x32 and x64); Apache 2.2.9 (x32)

Solution

Modified tiki_structures.structure_id to allow NULL values.

Assume this issue is closed given lack of response. Please open a new ticket on a supported version if issue still exists.

Workaround

Xavi (Jan 15th, 2009):

- Works for me. Changed status to "pending"
- Please retest on current stable branch 2.x.
- Thanks in advanced for reporting it.

Change Default Value = 0 in structure table. 😊

roysharp 06 Jan 09 21:59 GMT-0000

Can someone "in the know" please answer this as I am confused from the posted history whether the insert statement is wrong or the database is wrong.

If it's the table then should it be nullable or should it have a default value (0?).

Thanks,

Roy
