Description

when performing a search only the first page of results is available, the pagination links at the bottom of the page do not navigate to the subsequent pages.

Solution

tiki-searchresults.php contains a variable `$auto_query_args` that does not have all of the proper arguments identified. Adding 'highlight','where','search' will fix the pagination issue.

Line 15 of tiki-searchresults.php should contain:

```
$auto_query_args = array('initial','maxRecords','sort_mode','find','lang','highlight','where','search');
```
