Description

I looked today at http://info.tikiwiki.org/tiki-list_submissions.php and there are nearly 300 spam submissions there so far, and no way to delete them in groups. Maybe that's why nobody noticed my prior submission as info.tw.o editor from last month...

(the user need to be in info.tw.o Admin group in order to see the spam list. If your users is just in the info.tw.o_editors group, you'll see nothing but your own submissions if any.)

A text box to select the amount of rows to be listed would be welcome, and multiple checkboxes to select some or all, like with users, etc.

By the way, how can anonymous spammers post submissions to info.tw.o? They can't through http://info.tikiwiki.org/tiki-edit_submission.php (at least, nowadays)... Spam hole somewhere?
