### Description

If you show a list of image galleries and want to sort by images count you get an SQL query error.

Tiki outputs the following SQL Query

```
select g.`galleryId`,g.`name`,g.`description`,
g.`created`,g.`lastModif`,g.`visible`,g.`theme`,g.`user`,
g.`hits`,g.`maxRows`,g.`rowImages`,g.`thumbSizeX`,
g.`thumbSizeY`,g.`public`,g.`sortorder`,g.`sortdirection`,
g.`galleryimage`,g.`parentgallery`,count(i.`imageId`) as numimages from `tiki_galleries` g,
`tiki_images` i where i.`galleryId`=g.`galleryId` and `parentgallery`=? group by g.`galleryId`,
g.`name`,g.`description`, g.`created`,g.`lastModif`,g.`visible`,g.`theme`,g.`user`,
g.`hits`,g.`maxRows`,g.`rowImages`,g.`thumbSizeX`,
g.`thumbSizeY`,g.`public`,g.`sortorder`,g.`sortdirection`, g.`galleryimage`,g.`parentgallery` order
by `images` desc
```

As you can see - the order by references an invalid column - because in the select list the field is named "numimages" and the order by uses "images".

### Solution

Thanks for this ticket and for all the information included (the sql query and the origine of the problem).

It is now fixed in trunk code (which is in fact the tiki 3.0 code).

Should maybe be backported to 2.0 and released with 2.1 version.

I keep this ticket opened as the problem is not already fixed in 2.0 version.

Fixed also ported to 2.0. Ticket closed.
