Description

The new "saved_msg=y" fails when SEFURL is on - both new pages and editing. It gives me a 404 not-found error. Makes SEFURL pretty useless. Example:

http://www.casesofinterest.com/tiki/Everything+is+Patentable&saved_msg=y

Solution

The issue was htaccess. For SEFURL to work properly, _htaccess must be renamed (or merged into) .htaccess on apache. Replacing my May 2008 .htaccess with Aug. 2008 _htaccess fixed the problem.
