Description

Using flash plugin for playing mp3 files was possible, as I could reproduce some weeks ago.
I also documented that on the appropriate doc.tw.o pages:
<http://doc.tikiwiki.org/PluginFlash>

This was a working example listed from the doc.tw.o page:
<http://moviments.net/ilp/tiki-pagehistory.php?page=EntrevistaRadio4&preview=1>

```
{FLASH(movie=>"tikimovies/multiplayer.swf?url=http://usuaris.tinet.org/mikell/EntrevistaRadio4.mp3&MODE=AUDIO")}{FLASH}
```

However, after I upgraded to Tiki 2.0, that page stopped working (controls from multiplayer.swf are shown, but no mp3 is listened).

Maybe a lateral effect of all html sanitization mesures introduced in tiki 2.0?
