Description

Quicktags cannot easily be ordered i.e. the order in which they are displayed to the user. Currently the only way to do it is to prefix each quicktag name with a number to ensure they are sorted in the order in which you want to display them

Solution

You should be able to define an order in the exact same way that you can with Menu items, thus avoiding the need to prefix quicktag names with numbers. Therefore a new field, order number, needs to be added to the quicktags tables
