### Description

The first "title" provided in an external RSS feed is displayed as if it is the channel's title (description). Many RSS feeds provide a "title" element immediately after the "channel" element, containing a description of the channel. But if no channel title exists, the title of the first item is displayed as if it were the channel title, resulting in the first title being displayed twice.

### Solution

Closing since we can't reproduce in trunk. Chealer 2010-01-17
