### Description

I am trying to customize the look and feel of the Site Search Bar that gets added to the top of each page when the "Activate" button is clicked next to the "Site Search Bar" subsection of the "General Layout" tab of the Administrator "Look & Feel" page.

Basically, I just want to add "Enter keywords" here in the textbox.

I am having a hard time finding where this code is defined.

I have looked in the following files:

templates\tiki-searchindex.tpl

templates\tiki-searchresults.tpl

templates\modules\mod-search\_box.tpl

templates\modules\mod-search\_new.tpl

templates\styles\simple\modules\mod-search\_box.tpl

templates\styles\simple\modules\mod-search\_new.tpl

Could someone point me in the right direction?

Any insight is appreciated.

Thanks!

It depends on the theme, but generally in either tiki-site\_header.tpl or tiki-top\_bar.tpl. Be sure to check if the theme has its own versions of these files, which are used in place of the defaults. Then there's CSS for layout/styling in the theme's style sheet. Firefox and Firebug are good tools for identifying the CSS selectors involved. (The tikiwiki.org forums are probably a better place for this type of question.)

In 3.0, install:

[http://profiles.tikiwiki.org/Debug\\_Mode\\_Enabled](http://profiles.tikiwiki.org/Debug_Mode_Enabled)  
so you can get this info from the generated html
