Description

Could someone please make the fields this tracker uses available to the community, please? (easily done, since there's an export/import feature!)

I'm trying to create a support web site, so obviously need much the same thing as this site. Trackers are quite a learning curve, so a couple of good examples would be really useful!

If someone does this, I'll add an export of the fields I end up using and make them available too (I've got a couple of other tracker apps up my sleeve too).

Cheers!

Solution

Brilliant idea! Done!

I support this request too! 😊

(I have some trackers done for 1.8.5 related to users subscription to a course (but not using the new features from 1.9.0, just 1.8.x)

If anybody interested (and get to read this comment, write to me (UserPagexavidp at tw.o). Cheers, Xavi

I've created a Wiki page on tw.o for this purpose. I'm sure it'll one day move from there and become some cool facility (erm, tracker based?) but for now, it's at:

Done. I added to <http://tikiwiki.org/TrackerExamples>
