Description
   Currently, the length of the search result snippet is hard-coded to 250 characters (in searchlib.php).
   it would be nice if this could be defined by the admin as part of the search preferences.

Solution
   1. Create new preference for the search snippet length (default to 250).
   2. Change the searchlib.php to use the new preference.

   Need to included error checking (minimum and maximum values).

Importance
   5
