Description
    Please go to "Syntax Examples" here:
    http://www.wikimatrix.org/compare/TikiWiki-CMS-Groupware+MediaWiki

    Please also see:
    http://meta.wikimedia.org/wiki/Help:Wikitext_examples

    Some syntax could be supported as it doesn't really conflict with the existing.

    Basic formatting markup

    You can ''italicize text'' by putting 2 apostrophes on each side. 3 apostrophes will '''embolden the text'''. 5 apostrophes will '''embolden''' and ''italicize'' '''''the text'''''.

    Signature/timestamp

    You should "sign" your comments on talk pages: - Three tildes gives your signature: ~~~ - Four tildes give your signature plus date/time: ~~~~ - Five tildes gives the date/time alone: ~~~~~

Section headings

== Section headings == ''Headings'' organize your writing into sections. The ''Wiki'' <u>ab</u> ##software can automatically generate a [[table of contents]] from them. === Subsection === Using more "equals" (=) signs creates a subsection. ==== A smaller subsection ==== Don't skip levels, like from two to four equals signs. Start with 2 equals signs not 1 because 1 creates H1 tags which should be reserved for page title.

However, links & images could be more problematic.

Related:

- Wiki markup for icons
- Wiki editing: Preview with diff, like Mediawiki
- Infoboxes like MediaWiki/Wikipedia, but making use of trackers to be future-proof
- Support for the Wiki creole markup (syntax)
- MediaWiki import script

Some emoticons/smileys could be optionally parsed too, like this: ;)
("space_or_newline+semicolon+close_parenthesis")

and all the others common smileys of course 😃
