Description

At any list of pages, tiki-listpages.php for example, after checking some sites and choosing "Remove"
at the checkbox "Perform action with selected:" i get redirected to a new site with a list of sites i
have checked and a big button saying "Click here to confirm your action".
After clicking that button i again get redirected to to list but the pages have not been removed.

This bug was tested on 2 different wikis running on XAMPP on a W2K3-machine.

Hope you can help.

I was having this problem when I moved my tiki from one domain to another. I looked at tiki-adminusers.php and on line 192:
isset($_SESSION%22ticket_$area%22) when $area = 'deluser'
appeared to cause the condition to fail.

I "solved" the problem by disabling "Protect against CSRF with a ticket" in Administration > Login options. I imagine this is a security risk, so hopefully there is a fix in the future.
