Description

Hey Guys - I'm new to tikiwiki and have been trying to access the movies on this page ->

<http://tikiwiki.org/TikiMovies> BUT most of the ones referencing USA point to an expired account and the ones mentioning Europe generate an error saying i don't have permission (even when logged in) ..??..

e.g., in the section "Preliminary_Settings", the USA link resolves to this ->

<http://esc45.midphase.com/suspended.page/> even though the link is coded for this address ->

[http://www.teluguvaariki.com/sri-addons/tikiwiki_videos/Wiki ...](http://www.teluguvaariki.com/sri-addons/tikiwiki_videos/Wiki...) and when i hack the url to just the root domain, i get the same error and suspect this user's account is DOA ... i should note that i tried this a week or so ago and got the same response hence delayed sending this thinking it might clear up by now ..??..

and then when i click on "Editig a wiki page (Europe)" i get error - ie., "You do not have permission to use this feature" ... that link shows as ->

<http://tikiwiki.org/tiki-listmovies.php?movie=Wiki.swf&action=Display>

the same thing happens with the other videos in other sections like "Editing a wiki page", "Image Galleries", "Articles", "FAQs", etc ... the only video link that does work is the 24 minute intro with David Lankes - which is excellent by the way :>)

accordingly, please advise ... i would really like to watch these videos to get up to speed as i'm already having numerous problems ... a) i was able to install okay but the images in the gallery won't upload, or when they do appear to upload, i get a blank screen and see no images ... b) i can't get the secure login link to work with my dedicated server that shares a SSL cert across domains ... thus i installed tikiwiki on avantigroup.com/tiki but for the https i need to make a url callout that is

<https://secure.cooltea.org/avantigroup.com/tiki> but tikiwiki won't let me do this from admin control panel and forces <https://avantigroup.com> ... ugh ... sure, i could go in and hack the template but this kind of defeats the smarty template approach but i digress ...

thanks in advance for your attention to this matter and on positive side, it does look like you have a lot going for your project and i look forward to diving in further ... to be continued ... cordially,
chuck scott

We need volunteers to maintain this.

Who volunteers?

Thanks!
