Description
See this post:
http://themes.tikiwiki.org/tiki-view_forum_thread.php?topics_offset=1&forumId=2&comments_parentId=618

A user added some links to external images, which seem to be dynamically linked to cached copies by Tiki.

This is the external link itself:
http://neil.s.alexander.googlepages.com/tw19.jpg

This is the url to the cached image by themes.tw.o:

Cached images are broken, showing this on the browser:
Workaround until fixed, you can

- use *nocache* parameter on the links pointing directly to external images
- use shadowbox feature and No image specified. One of the following parameters must be set:
  - fileId, randomGalleryId, fgId, attId, id, or src. syntax to show up external images
- disable "Use cache for external pages" on Admin > General
