Description
    When using OpenID + Registration CAPTCHA...
    With Tiki 2.2...

    I attempted to register using my OpenID:

    1. On the Login page, I entered my OpenID.
    2. My OpenID was validated and Tiki shows the page where I can either associate my OpenID with an existing Tiki account, or register as a new user.
    3. I completed the registration form (including the correct CAPTCHA), but Tiki keeps saying that the Anti-bot code was incorrect.

    Additionally, the registration form presented with the OpenID does not:

    - Display the password minimum requirements (such as number of characters).
    - Allow for the selection of groups.

    Duplicate of "Prevent automatic/robot registration:" interferes with OpenID

Solution

This is solved since r24298 in trunk and branches 3 and 4. This should be fixed in Tiki 3.4, 4.2 and 5.

Group selection on OpenID registration was added on trunk r24275. Minimum password requirements don't apply to OpenID.

besides reporting for failure of wrong antibot, tikiwiki associated the google openid with admin account.
