Description

Users in groups without the "tiki_p_admin_file_galleries" group permission set cannot see any file galleries in the "List Galleries" page, even if "tiki_p_list_file_galleries" (or all file gallery permissions) are switched on for the group and/or the File Gallery.

However, the user can still access the gallery directly if they know the exact URL, eg:
http://site.com/wiki/tiki-list_file_gallery.php?galleryId=2

The "List Galleries" page loads, but the list of galleries shows only "No records found". If "tiki_p_admin_file_galleries" is enabled, all permitted galleries appear in the list.

Workaround

Please retest in Tiki 3.x, since it seems fixed there.
