Functionality seems OK.

Untested mod install proc

Basic Workspace desktop modules tested

Update by xavi:

Thanks pingus! you had missing just one place to change that Id by wstypeld, at tiki-workspaces_desktop.php, but thanks to your patch, I could find it and fix it also!

I've uploaded (comitted) the updated version to svn, and also you can test it (ensure you use version 1.6.2, not just 1.6). See:

<http://edu.tikiwiki.org/tiki-index.php?page=AulaWiki> for more information on where to install it from.
