Description
when I use persian names for pages the "" in wiki outputs something like this

<p><a href='#' inhibited_Click="javascript:window.open('tiki-editdrawing.php?page=%D8%A7%D9%87%D8%8C%D8%A7%D9%81+%D9%88+%D9%85%D8%A7%D9%85%D9%88%D8%B1'><a class='dynavar' inhibited_Click='javascript:toggle_dynamic_var("AF");' title='Click to edit dynamic variable: AF'>NaV</a></span><input type='text' name='dyn_AF' value='NaV' /></a></span></p>

<p><a href='#' inhibited_Click="javascript:window.open('tiki-editdrawing.php?page=%D8%A7%D9%81+%D9%88+%D9%85%D8%A7%D9%85%D9%88%D8%B1'><a class='dynavar' inhibited_Click='javascript:toggle_dynamic_var("DB");' title='Click to edit dynamic variable: DB'>NaV</a></span><input type='text' name='dyn_DB' value='NaV' /></a></span></p>

<p><a href='#' inhibited_Click="javascript:window.open('tiki-editdrawing.php?page=%C8%8C'><a class='dynavar' inhibited_Click='javascript:toggle_dynamic_var("AA+");' title='Click to edit dynamic variable: AA+'>NaV</a></span><input type='text' name='dyn_AA+_value='AA+' /></a></span></p>
in the HTML code which in browser adds this line to the picture of drawing:

NaVD8%A7%D9%81+%D9%88+%D9%85%D8%A7%D9%85%D9%88%D8%B1NaV8C%D8NaVD8%A8%D8%A7%D8%B4%DANaVD8%A7%D9%87&path=/test/tiki&drawing=foo2','','menubar=no,width=252,height=25');"/>

and also the link for editing the drawing does not work

Solution

mail abbas - need more information - Problem description doesn't tell much...
- amette

Ok, got it ;) - doesn't do as long a text at my place, but adding german Umlauts to the page name, creates the same problem.

ML: Won't fix as feature was removed.
