Description
We already have in version 3.0 on tiki-admin.php?page=login

On permission denied, display login box for anonymous:
On permission denied, send to this url:

Similarly, it would be nice to send people to a specific URL or wiki page upon logout.

Ex.:
"Thank you for visiting"

Some ideas for the future. We should have a section in the admin panel "login/logout/navigation" with things like:

redirect on login (which is group home pages)
redirect on user account validated. Ex.: Wiki page "Thank you for registering"
redirect on logout. Ex.: Wiki page "thank you for your visit"
Close site (except for those with permission). Ex.: Wiki page "The site is closed for maintenance"
Close site when server load is above the threshold (except for those with permission). Ex.: Wiki page "The site is under pressure."

On permission denied, display login module (for Anonymous). (as it does now)
etc.

Also on tiki-admin.php?page=features
Redirect On Error
Custom Home

Importance
3
