Description

Clean install on a new (multitki) site based on trunk from today (Jan. 24th, 2009) shows 2 SQL errors:

```
SELECT patch_name FROM tiki_schema
Table 'tikitrunk_etcs.tiki_schema' doesn't exist
#2008-11-20 JohannesMoser
ALTER TABLE `tiki_polls` ADD `anonym` ENUM( 'a', 'u', 'i', 'c' ) NOT NULL DEFAULT 'u'
Duplicate column name 'anonym'
```

Solution

The duplicate column is not an issue. The other error was already reported in 2117.

I confirm I saw this too

RandyH 19 Jun 09 16:10 GMT-0000
Just upgraded three different installations from 2.4 to 3.0. Unfortunately all are Fantastico control so I cannot get to the shell. But all three now do not work with same "tiki_schema" table missing error.
