Description
  This showed up after upgrading from 1.9.11 to 2.2

  When accessing Wiki pages with external links (mixed cacheing and nocache), with PHP error reporting on, notified of an invalid offset in tikilib:6193.

Solution
  Replace:

  if ($matches2==='nocache') {

  with

  if ( count($matches) > 2 && $matches2==='nocache' ) {

  (Please note, PHP isn't a language I know, so some of the syntax may be off).

  Thanks.
