Description

I have the following problem:

- as anonymous i load home page with two panels (modules) on the left and right (right one is logon box)

- I log in (both panels correctly diplayed still)

- I log out and right panel is not longer displayed on home page

I need to refresh page to see it again

I use Display Always for both modules in Look and Feel/general layout.

I use tikipedia theme.

Do u have any ideas why it might happen?
