Description
The current wiki syntax does not allow commas when specifying the page name for an external wiki link. This is a problem for example when trying to setup an external wiki link to a list of Bugzilla bugs. In "Admin external wikis" I can create this entry

<table>
<thead>
<tr>
<th>Name</th>
<th>Extwiki</th>
</tr>
</thead>
<tbody>
<tr>
<td>buglist</td>
<td><a href="https://bugzilla.mozilla.org/buglist.cgi?bug_id=$page">https://bugzilla.mozilla.org/buglist.cgi?bug_id=$page</a></td>
</tr>
</tbody>
</table>

But using

```
((buglist:1000,1001))
```

on a wiki page does not work.

Solution
By allowing a larger set of characters in the page name portion of the external wiki link the external wiki link feature would be more useful.

Workaround
No workaround possible.

ML: perhaps wiki plugins alias could be used to create this (new in version 3.0)
