Description
     Using 2.3, when some user renames a page that you were monitoring, you get an email message with a broken link to stop monitoring, because there is no hash at the url.

     Example:

     If you don't want to receive these notifications follow this link:
     http://yourdomain/tiki-user_watches.php?hash=

Importance
     6

Priority
     30
