Has the "future version" of the
http://doc.tikiwiki.org/User+Preference+Field&structure=Documentation been implemented?
I keep asking on irc how to set up setting the "Real name" user preference at registration time. The "Real name" and "realname" user pref. field params did not work for me.

luciash d' being 30 Jun 10 17:01 GMT-0000

you have to use realName as option in the preference type field

blue7hand 25 Oct 14 19:38 GMT-0000

Would be great to have a field type 'avatar', in order to include avatar upload inside user tracker.
:)

Torsten Fabricius 26 Oct 14 09:20 GMT-0000

Afaik you can upload pictures in trackers and freely name the pages.
Aswell you have the function and field "Avatar" in the personal preferences.

As a user tracker is extending the personal preferences I do not understand the reason for adding a function Avatar twice.
<=>
Maybe there is a case or a necessity for another extended option to show personal preferences?

Tell us, for what setup / structure / showcase you need "Avatar" in "User Tracker", please - maybe that makes things a bit clearer.

Best regards,
Torsten
