Description

When enabled feature_search it is possible for Anonymous user to read protected pages via special search request

Just try "a" or any other word that is in hidden or protected area in search box - tiki-searchresults.php give U text from hidden pages

from tiki-searchresults.php

http://tikiwiki.org/tiki-view_forum_thread.php?topics_offset=0&forumId=4&comments_parentId=16071

Solution

```
if ($feature_search != 'y')
```

so for now it is better to disable feature_search
If U have hidden data in your tikiwiki
damian

I can't reproduce it. Both search are pretty secure now and "a" is a small word. Did you try with
1.19.1?
sylvie

I'll do some short testing on that one - if not finding anything - I'll close. For now: PENDING!

This was closed and set to Won't fix.

Are you sure about this:

"so for now it is better to disable feature_search
If U have hidden data in your tikiwiki"

My understanding is that this was corrected.

Damian Parker 04 Jul 05 06:11 GMT-0000

Why the heck is it assigned to me? I havent touched it.

awolff 05 Nov 05 22:19 GMT-0000

Running a 1.9.1 I have the same problem. In the search result list it shows snippets of all search results. If I click on them to see the whole page/article etc. I get a permission denied.

amette 05 Nov 05 23:21 GMT-0000

I couldn't find anything in my simple tests - but the last comment makes me prioritize this higher...
