Description

To reproduce:

1. Go to a tracker item. Ex.:

http://dev.tikiwiki.org/tiki-view_tracker_item.php?itemId=2441

1. Click full screen mode

You are sent to

http://dev.tikiwiki.org/tiki-view_tracker_item.php?itemId%3D2441&fullscreen=y

After, that initial error, full screen mode works well

It has been suggested this has a link with ShortURLs

Gary wrote:

When using the short url, then clicking the fullscreen icon, and then clicking it again to leave fullscreen

view, the url gets mangled and I end up at the home page. (Example: <http://zukakakina.com/tw3/absE> (external link) - <http://zukakakina.com/tw3/tiki-index.php?page%3DabsE&fullscreen=y> (external link) - <http://zukakakina.com/tw3/tiki-index.php?page%253DabsE&fullscreen=n>. (external link) The first = becomes encoded so the url breaks. chibaguy - r17975)
