Description
Using a Tracker with an Attachment field with the TRACKER plugin:

If the user does not have permission to attach files to tracker items (but can insert/create new tracker items), Tiki will, nevertheless, allow the user to select a file to submit with the tracker. Upon submission, there is no notification to the end-user that their attachment was not really included.

Solution
The attachment field (in the tracker via the TRACKER plugin) should be disabled (with an explanation) when the user does not haver permission to attach items to trackers.
