Description
Some of the preinstalled themes seem to be incomplete:
I have the word "loading..." in the top left corner of each page.

Check: http://list.vic-fontaine.com/
(test user/pw if needed: smarty)

I found this forum topic:
http://tikiwiki.org/tiki-view_forum_thread.php?forumId=6&comments_parentId=32558&highlight=loading

However, in this case, preinstalled themes are affected.
For example:
bluegreen.css: error
boreal.css: works fine
brtiki.css: error
codex.css: works fine
etc...

Solution
Insert the css code from the forum thread into all theme css files...

In a clean installation, enable ajax to reproduce this behaviour

Jan Krohn 18 Mar 10 14:07 GMT-0000
Problem is no longer present. I'll close this one as well.
