Description

You can't assign an empty category to the tracker category type field. This would come very handy in connection with the Autocheck-feature I RFEd before..

http://dev.tikiwiki.org/tiki-view_tracker_item.php?itemId=246&show=view&status=op&trackerId=5&sort_mode=f_41_desc

Top

|

|---1 Stuff

|

|---2 More Stuff

If you for example assign parentId=1, then you don't get a Checkbox with Stuff, but you get two boxes with Stuff and More Stuff - Tiki jumps back to the higher level, that's not empty.

As per Tiki23 you can set a tracker with a category field. When you create an item you don't have to set a category (unless it is mandatory... then you create your own problem ?).

Not setting a category is like setting to none, or eventually you create a "none" category.
