Description

When using the TIKINEWT.CSS theme with version 3.0 RC1, on some administration screens, like USERS tiki-adminusers.php, or USER CONTACTS PREFERENCE tiki-user_contacts_prefs.php, the main part of the content division is too high, and covers the TABS for that particular page.

This is not a problem if TABS are not used. This does not appear when using another THEME, such as THENEWS.CSS

Solution

Fix the CSS??
