Description

Labels for forum administration options to link a Forum and mailing list are very obtuse. Suggested cleanup as made in the documentation would help users.

Solution

Change "Forward messages to this forum to this e-mail address, in a format that can be used for sending back to the inbound forum e-mail address" to "Mailing List address that Tiki can use to send new forum posts too"

Change "Originating e-mail address for mails from this forum" to "From e-mail address for new forum posts"

Change "Add messages from this email to the forum" to "Incoming e-mail account to get mailing list messages into forum"
