Description

to test this:

1. one zip file with 30MB with photos smaller than 1MB inside
2. php memory limit 512MB, upload/post limit 500MB
3. tikiwiki 3.0 final
4. file galleries and image galleries enabled.
5. file and image galleries working with directories, no databases
6. test uploading a simple image to file galleries: ok
7. test uploading a simple zip file with 3 photos inside: ok

to reproduce:

1. upload the zip file to galleries
2. get the error: Cannot upload this file maximum upload size exceeded
3. upload the same zip to file galleries: no problem and unzipped

so why is it working with file galleries and not with image galleries?

Solution

no solution found.
