Description

Obviously:

DD_belatedPNG fix is enabled by default on the site logo and is intended for IE 6 only.

The IE 6 check is in lib/setup/js_detect.php

```
strpos($_SERVER'HTTP_USER_AGENT', 'MSIE 6') !== false
```

The problem with this is that IE 8 will also get detected, check this:

Mozilla/4.0 (compatible; MSIE 8.0; Windows NT 6.1; Trident/4.0; Mozilla/4.0 (compatible; MSIE 6.0; Windows NT 5.1; SV1) ; SLCC2; .NET CLR 2.0.50727; Media Center PC 6.0; .NET CLR 3.5.30729; .NET CLR 3.0.30729; .NET CLR 1.1.4322)

The bug with all this lies in the fact that IE 8 shows a few js errors on DD_belatedPNG.js on each page load and that could prevent IE from submitting.

Solution

Workaround

I did this but you might find a better approach:

```
strpos($_SERVER'HTTP_USER_AGENT', 'MSIE 6') !== false &&
```

```
!strpos($_SERVER'HTTP_USER_AGENT', 'MSIE 8') !== false
```
