I experience the same thing. This happens during first login. Cookies have been enabled but I keep getting redirected to tiki-login.php. I only login successfully using this page.

Alexander 09 Mar 10 19:08 GMT-0000

I install tikiwiki 4 on last XAMPP on windows.
When i open tiki site as subfolder http://localhost/tikiwiki - I login under admin.

But when I login from virtul host root http://tikiwiki.local I got error

You have to enable cookies to be able to login to this site.

thraxisp 12 Nov 10 17:47 GMT-0000

I found the same issue in 6.0.

In my particular case, the path used in saving the cookie is incorrect, if the site is not at the DocumentRoot, or the request URI is manipulated via mod_rewrite.
