Description

Tiki and Pear::Auth (LDAP) authentication doesn't work together in version 3.0. A tiki local user can't log in anymore if the Pear::Auth method is set, except admin.

If this is the same issue I encountered in TikiWiki 12 LTS, I was able to resolve it by correcting the path to the Pear Net_LDAP2 library in `wiki/lib/auth/ldap.php`:

```
require_once ('PATH_TO/wiki/vendor_extra/pear/Net/LDAP2.php');
```
